TITLE : ON-VEHICLE ACOUSTIC DEVICE

ABSTRACT : PROBLEM TO BE SOLVED: To enable an MD regeneration device and a CD reproduction device to be used as an on-vehicle equipment or a portable one.

SOLUTION: This device is equipped with a casing 21 detachably housing an MD reproduction unit 7, a locking lever 11 for locking the MD reproduction unit 7 onto the casing 21, a connector 25 for making electrical connection, a coil spring 24 for letting the reproduction unit 7 be projected out of the casing 21 when a releasing button 10 is actuated, an oil spring for preventing the vibration of a chassis 1 housing and fixing the casing 21 from being transmitted to the casing 21, and with a base isolation structure composed of an oil damper.
